TRANSPARENT OLED DISPLAY KIOSKS

SPECKTRON

Meet the Specktron 30" Transparent OLED Kiosk—a sleek, all-glass digital canvas that blends seamlessly into luxury retail counters, museum display cases, boutique showrooms, and executive lobbies. When off, it's nearly invisible. When on, it delivers floating, high-brightness visuals that captivate without clutter.

Features

True Transparency, Zero Visual Noise: With its transparent OLED panel, your physical product remains the hero—while digital overlays add context, animation, or interactivity without obstruction.

600 Nits Brightness: Unusually bright for a transparent display, ensuring crisp visibility even in well-lit indoor environments like malls, galleries, or sunlit lobbies.

Fully Interactive Touch: Built-in capacitive touch lets users explore product details, zoom into textures, or navigate brand narratives—turning passive viewers into active participants.
